**How risky is it?**

The value of your investment can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with a higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**Risk rating**

Counsel has rated the volatility of this fund as **medium**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What are the Risks of Investing in the Fund?" section of the fund's simplified prospectus.

**No guarantees**

Like most mutual funds, this fund doesn't have any guarantees. You may not get back the amount of money you invest.

<b>Inappropriate short-term trading fee</b>	A fee of 2% of the amount switched or redeemed may be charged by the fund for inappropriate short-term trading which is defined as trading within a short period of time (less than 90 days) that Counsel believes is detrimental to fund investors.
<b>Excessive short-term trading fee</b>	A fee of 1% of the amount switched or redeemed may be charged by the fund if you invest in the fund for less than 30 days and your trading is part of a pattern of short-term trading that Counsel believes is detrimental to fund investors.
